

Andrew De Spain

drewnimaticanim@gmail.com • 801-574-7879 • [LinkedIn](#) • [dstechart.com](#)

Technical Artist with 3+ years of game-development experience specializing in Unreal Engine asset integration, rigging, animation pipelines, destruction systems, and Python tools for automation. Experienced collaborating across Art, Animation, Design, and FX teams to troubleshoot pipelines, improve workflows, and deliver production-ready gameplay assets.

Key Achievements & Rewards

- Recognition from a Halo original developer during an executive-level demo for Warthog vehicle rigging, initial design tuning, and hybrid-engine integration.
- Point of contact for support on Dynamic Object Workflows and integration for multiple teams at Halo Studios.
- Contributed to two College Emmy award winning student films.

Experience

Halo Studios (Aquent LLC) - Halo Campaign Evolved

Technical Artist : December 2024 - Present

- **Character & Vehicle Integration:** Supported the character team with asset integration into Halo Studios's hybrid Unreal Engine pipeline. Authored collision and physics meshes for ten characters and several vehicles. Assisted Game Design with initialized gameplay character and vehicle setup.
- **Destruction Systems:** Partnered with FX and Game Design to enhance destruction fidelity by building and integrating debris systems, tuning damage behaviors for seven assets. Provided technical guidance on gameplay-driven destruction workflows.
- **Rigging:** Designed and implemented a skeleton and control rig for the Warthog vehicle using a custom Python system. Aided the animation and design teams by debugging, skinning, and refining rig functionality across multiple vehicle and character rigs.
- **Legacy Animation Retargeting:** Conducted large-scale automated animation audits and developed retargeting scripts for thousands of legacy sequences across ten characters, and resolving legacy animation state systems for gameplay logic.

Neon Machine - Shrapnel

Technical Artist (Rigging) : August 2023 - September 2024

- **Character Integration:** Worked with the character team to prepare, manage, and integrate several MetaHuman characters into the engine.
- **Character Customization Systems:** Primary support for character customization workflows, including skinning and weight painting 50+ sci-fi and militaristic clothing assets, and integrating skinned assets into both the engine and Shrapnel's customization system.
- **Research & Development:** Assisted the art team in researching and developing solutions for character customization pipelines, rendering icon image systems for hundreds of new customizable weapon and character skins, and engine integration workflows.

Brigham Young University – Student Capstone Projects

Rigging TD & Technical Animator : January 2022 - June 2023

- **Rigging (Game & Film):** Collaborated across four capstone projects to develop five facial rigs, five mechanical rigs, five bipedal rigs, two quadruped rigs, and multiple prop rigs for two games and two films.
- **Team Leadership:** Led and mentored a team of five TDs, teaching rigging workflows and ensuring rigs met the animation team's creative and technical requirements for a film capstone.
- **Generalist Experience:** Animated three shots and lit four shots for a senior capstone film; created idle and movement animations for student game projects.

Shipped Projects

Halo: Campaign Evolved

XBOX X|S, PLAYSTATION 5, PC
July 28, 2026

SHRAPNEL

PC
Mar 12, 2026

Competencies

Technical Skills: Unreal Engine • Maya • Python • PyQt • Blueprints • Maya Rigging • UE Control Rig • Animation Retargeting • Character and Vehicle Integration • Collision and Physics Meshes • Mesh and LOD Generation (Havok, Simplygon) • Destruction Systems • Skinning and Weight Painting • Pipeline Development • Proprietary Engines • AI

Production: Perforce • Jira • Adobe Creative Suite

Education

Brigham Young University

Bachelor of Fine Arts
August 2019 - May 2023

Salt Lake Community College

Associate of Science
January 2016 - April 2019
